Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-11, drawn to an expandable scaffold, classified in class 182, subclass 223.
- II. Claims 12-15, drawn to a scaffold caster locking means, classified in class 182, subclass 17.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a scaffold without castor wheels. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
